Objective

To obtain a challenging position as a Data Analyst, Supply Chain Analyst or Product Analyst where I can utilize my analytical and technical skills to provide valuable insights and improve business performance.

Summary

Talented Data Analyst with extensive experience in data analysis, visualization, and reporting. Proficient in using Excel, SQL, R, PowerBI, and Tableau to analyze complex data sets, create interactive visualizations, and dashboards. Adept at working with cross-functional teams to identify business opportunities, provide insights, and implement data-driven solutions.

Experience

Buying Assistant   01/2023 to Current
Frasers Group   Manchester
- Regularly negotiated with key suppliers, achieving optimum price and delivery options.
- Collaborated with vendors in identifying and resolving supply chain problems for timely product deliveries.
- Liaised with manufacturers to finalise and confirm production schedules and targets based on customer needs and available materials.
- Researched and communicated changes in pricing or terms to avoid negative effects on business profitability.

Data Analyst   05/2021 to 08/2022
Raregem Logistics
- Analyzed large data sets using Excel, SQL, and R to identify trends, patterns, and insights.
- Created interactive dashboards and reports using PowerBI and Tableau to visualize data and communicate insights to stakeholders.
- Collaborated with cross-functional teams to provide insights and recommendations that increased revenue by 12%.
- Conducted ad-hoc analysis and data mining to support business decisions and improve operational efficiency.
- Developed and maintained databases to store and manage large data sets.
- Prepared and presented reports to senior management and other stakeholders.

Supply Chain Expert   10/2020 to 06/2022
Africa Resource Centre
- Conducted data analysis and created dashboards using Excel, PowerBI, and Tableau for the marketing team to measure campaign effectiveness.
- Developed predictive models using regression and decision trees to identify customer segments with high potential value.
- Built SQL queries to extract data from the company's database and performed data cleaning and manipulation to prepare data for analysis.
- Collaborated with cross-functional teams to identify business needs and provide data-driven insights for decision-making.
- Communicated findings and recommendations to stakeholders in a clear and concise manner

Pharmacist   06/2019 to 06/2020
